

UPDATIED

TOUTISM Highlights

Highlights

- Spurred on by a strong global economy and special events held to commemorate
 the new millennium, world tourism grew by an estimated 7.4 per cent in 2000—
 its highest growth rate in nearly a decade and almost double the increase of 1999.
- According to results received by WTO through August 2001 the total number of
 international arrivals reached a record 699 million in 2000. In other words, nearly
 50 million more arrivals were recorded, the same number of new tourists as a
 major destinations such as Spain or the United States receive in the entire year.
- Europe—which accounts for 58 per cent of international tourism—grew by an impressive 6.1 per cent to 403 million arrivals, nearly 25 million more trips than one year earlier.
- All regions of the world hosted more tourists in 2000, although the fastest developing region continued to be East Asia and the Pacific with a growth rate of 14.7 per cent and some 14 million more tourists than 1999.
- Receipts from international tourism climbed to US\$ 476 billion in 2000, an increase of 4.5 per cent over the previous year. Worldwide the average receipt per arrival amounted to US\$ 680.
- Expectations for 2001 are for a more moderate pace of growth. Given the cooler economic climate it would be a good result if the tourism sector could consolidate the record growth of 2000 and add a modest increase.

(Data collected through August 2001)

Europe and the Americas are the main tourist-receiving regions. But since other regions are growing at a faster pace, their respective shares in the world total show a declining tendency. In 2000 Europe accounted for 58 per cent and the Americas for 18 per cent. East Asia and the Pacific is the region which has most benefited from this transformation of the market. Historical data show that this region experienced the highest growth rate, having obtained a 16 per cent share of the world market in 2000.

(Data collected through August 2001)

In 2000, the receipts registered for international tourism amounted to over US\$ 1 billion per year in 59 countries and territories out of approximately 200. The United States is the unchallenged leader with US\$ 85 billion in international tourism receipts. Three important Mediterranean destinations –Spain, France and Italy– made around US\$ 30 billion each. The United Kingdom registered US\$ 20 billion and, Germany, China, Austria and Canada earned over US\$ 10 billion each.

Americas

Africa

Americas recorded its fastest growth in the Caribbean (7.5%), while North and Central America also showed solid increases, of 5.7 per cent and 7 per cent respectively. Despite the strength of the US dollar, international arrivals to the United States were up by 4.9 per cent due to continuing growth from major overseas markets.

East Asia and the Pacific

East Asia/Pacific saw growth in tourist arrivals that was driven by big increases in China and its special administrative regions of Hong Kong and Macao. Southeast Asia—especially Thailand, Malaysia, Cambodia and Viet Nam-is becoming one of the world's favourite tourism destinations with demand outstripping tourist facilities. Australia enjoyed its own tourism boom due to the Sydney Olympics and surrounding publicity.

Regional

Europe was the star performer of world tourism in 2000, with tourists attracted to Germany for Expo 2000 and to Italy for the Vatican Jubilee. Eastern European countries recovered following the war in Kosovo and Turkey recuperated after two years of declining tourism due to instability and natural disasters.

Middle East

Middle East tourism was set for its best year ever as tourists flocked to historic sites associated with the life of Jesus Christ on the 2000th anniversary of his birth. In the first nine months of the year, arrivals were up by as much as 20 per cent, but the region ended the year with a lower—yet vigorous—growth rate of 13 per cent due to the renewed violence in the last quarter of the year. The ongoing strong growth of Egypt is another substantial factor in the region's expansion.

South Asia

South Asia is another of the success stories of 2000, with tourist arrivals growing by 11 per cent—nearly four points above the world average. Although it did not host any world renowned events, tourists are increasingly seeking out its exotic destinations—especially Iran and India.

International

Tourism

Expenditure

In 2000, 46 countries recorded more than US\$ 1 billion in international tourism expenditure, with the big industrial economies clearly in the lead. The United States, Germany, the United Kingdom and Japan top the list with spending ranging from US\$ 31 billion to US\$ 65 billion per year. These four countries represent over one-third of total international tourism expenditure. They are followed by France, Italy, Canada, and the Netherlands. Each of these countries spends between US\$ 12 and 17 billion, adding up to 12 per cent of total international tourism expenditure.

Prospects

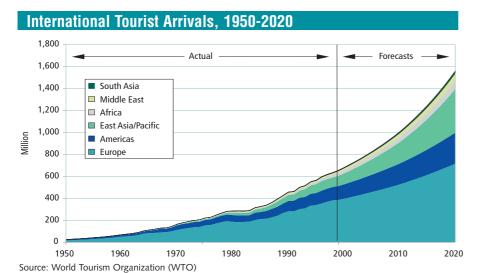

Short-term

IP Address: 161.53.52.8 Friday, January 13, 2012 The tourism sector in the upcoming year is not expected to perform quite as well as the event filled year of 2000. The world economy was also remarkably strong in 2000, with world economic output as measured in Gross Domestic Product (GDP) growing by an extraordinary rate of almost 5 per cent. As a result disposable income increased and boosted discretionary spending on tourism. However, growth rates reached in 2000 for both tourism and economic output are not sustainable in the longer run and should be considered as exceptions.

Source: International Monetary Fund, World Tourism Organization

For the tourism sector it would be a good result to consolidate the growth of the year 2000 and to increase by a more modest rate in the upcoming year. Initially, for 2001 a growth rate is anticipated around or somewhat below the 4.1 per cent average annual growth rate that is projected in WTO's long-term forecast *Tourism 2020 Vision* for the period up to 2020.

Tourism 2020 Vision is the World Tourism Organization's long-term forecast and assessment of the development of tourism up to the first 20 years of the new millennium. An

essential outcome of the Tourism 2020 Vision are quantitative forecasts covering a 25

years period, with 1995 as base year and forecasts for 2000, 2010 and 2020.

WTO's Tourism 2020 Vision forecasts that international arrivals are expected to reach over 1.56 billion by the year 2020. Of these worldwide arrivals in 2020, 1.18 billion will be intraregional and 377 million will be long-haul travellers.

The total tourist arrivals by region shows that by 2020 the top three receiving regions will be Europe (717 million tourists), East Asia and the Pacific (397 million) and Americas (282 million), followed by Africa, the Middle East and South Asia.

East Asia and the Pacific, South Asia, the Middle East and Africa are forecasted to record growth at rates of over 5 percent per year, compared to the world average of 4.1 per cent. The more mature regions Europe and Americas are anticipated to show lower than average growth rates.

Europe will maintain the highest share of world arrivals, although there will be a decline from 60 per cent in 1995 to 46 per cent in 2020. By 2010 the Americas will lose its number two position to the East Asia and the Pacific region which will receive 25 per cent of world arrivals in 2020 with the Americas decreasing from 19 per cent in 1995 to 18 per cent in 2020.

International Tourist Arrivals by Region (millions)

	Base Year	Fore	ecasts	Average Annual Growth Rate (%)	Market s	share (%)
	1995	2010	2020	1995-2020	1995	2020
Total	565.4	1,006.4	1,561.1	4.1	100	100
Africa	20.2	47.0	77.3	5.5	3.6	5.0
Americas	108.9	190.4	282.3	3.9	19.3	18.1
East Asia/Pacific	81.4	195.2	397.2	6.5	14.4	25.4
Europe	338.4	527.3	717.0	3.0	59.8	45.9
Middle East	12.4	35.9	68.5	7.1	2.2	4.4
South Asia	4.2	10.6	18.8	6.2	0.7	1.2
Intraregional (a)	464.1	790.9	1,183.3	3.8	82.1	75.8
Long-Haul (b)	101.3	215.5	377.9	5.4	17.9	24.2

Source: World Tourism Organization (WTO)

- a) Intraregional includes arrivals where country of origin is not specified
- b) Long-Haul is defined as everything except intraregional travel.

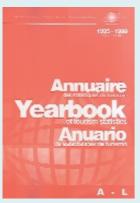

Long-haul travel worldwide will grow faster, at 5.4 per cent per year over the period 1995-2020, than intraregional travel, at 3.8 per cent. Consequently the ratio between intraregional and long haul travel will shift from around 82:18 in 1995 to close to 76:24 in 2020.

WORLD TOURISM ORGANIZATION New Publications

Yearbook of Tourism Statistics - 2001 Edition

This trilingual twovolume publication is recommended to be "the best source of international tourism statistics in the world". The publication provides for over 190 countries and territories detailed data on arrivals and nights of international inbound tourism broken down by country of origin of visitors/tourists Countries are classified by alphabetical

order. Volume I covers countries from A to L (Albania to Luxembourg) and Volume II covers countries from M to Z (Macau to Zimbabwe).

Published: July 2001 Pages: 920 Price: 150 US\$

Trilingual (English, French, Spanish)

Outbound Tourism

For tourism product development and the promotion of destinations in nowadays competitive age it is necessary to achieve a clear profile of the travel behaviour and preferences of actual and potential clients. This is the aim of these reports which provide a sound basis of information on outbound tourism from the respective countries. They focus on the characteristics of outbound

travel, give significant information on the generating markets and describe the target group profiles. These reports have become an essential and valuable tool for both the public and private sector in destinations interested in or receiving tourists from these countries as well as for the travel industry in these generating countries.

Tourism 2020 Vision

These newly released reports continue WTO's programme in the field of forecast studies. The series is comprised of six regional volumes (Africa, Americas, East Asia and the Pacific, Europe, Middle East and South Asia) and a world volume on global forecasts and profiles of market segments. Each regional volume is divided into three parts. Part one examines the developments of tourism in the region in the first half of the 1990s, analyzing especially the key factors which determined the region's prospects. The second part

deals with the various determinants governing the forecast to the year 2020, while the third part presents the forecasts themselves taking as well into account the different sub-regions.

Compendium of Tourism Statistics - 2001 Edition

The 21st edition of the Compendium of Tourism Statistics provides statistical information on tourism in 204 countries and territories around the world. The Compendium includes easily accessible data from 1995 to 1999 in 32 key areas of tourism supply and demand. The terminology of the present edition of the Compendium has been adapted for the first time to the new or updated

concepts applied in the Tourism Satellite Accounts: Recommend Methodological Framework. Each Compendium includes a set of five thin pasteboards with the text of the selected indicators and the basic methodological references in Arabic, French, German, Russian and Spanish.
